Summary

Software Engineer specializing in production AI and cybersecurity applications, with experience building agentic AI and RAG systems, LLM evaluation and fine-tuning workflows, and user-facing web and mobile products. Combines full-stack engineering with Azure cloud infrastructure, Terraform, and CI/CD, with a track record of taking research-driven cybersecurity solutions from prototype to production.

Work Experience

Aug. 2024 - Present	Software Engineer, cyberGEIGER GmbH <i>Freiburg, Germany</i> • Develop agentic AI and retrieval-augmented generation (RAG) systems on Azure AI for cybersecurity use cases, including automated threat and vulnerability assessments through the Intelligent Assessment Service and security-awareness training with cyberCoach • Drive frontend engineering for SME- and learner-facing products, including GeigerToolbox and the sysder AI Assistant, while owning release engineering and CI/CD workflows • Contribute to AI-powered learning experiences – DataPro Assistant and DataPro Games – for the DataPro Erasmus+ programme in collaboration with Pädagogische Hochschule Freiburg • Provision and evolve Azure cloud infrastructure using Terraform and infrastructure-as-code practices • Conduct applied machine-learning research on adapting foundation models for security applications, with a focus on synthetic-data generation, evaluation pipelines, and open-source publication
Mar. 2023 - Aug. 2024	IT Consultant, IAESTE Services / ISACD <i>Benin City, Nigeria</i> • IT consulting and exchange administration for IAESTE's student exchange programme
Mar. 2022 - Jan. 2023	Research Assistant, Institute for Interactive Technologies (IIT) <i>University of Applied Sciences and Arts Northwestern Switzerland.</i> • Built GeigerToolbox, a cybersecurity risk-assessment tool for SMEs, as part of the EU Horizon 2020 GEIGER research project
Apr. 2021 - Mar. 2022	Mobile Application Developer (intern), Institute for Interactive Technologies (IIT) <i>University of Applied Sciences and Arts Northwestern Switzerland.</i> • Prototyped and designed the initial GeigerToolbox concept for the EU Horizon 2020 GEIGER research project

Early Career

2017 - 2021	Nigeria • Tech Facilitator, HarvardCom Computer Institute and Technologies • FrontEnd Developer (Volunteer), ICT, Federal University of Petroleum Resources • Learning Facilitator, Google Digital Skills for Africa • Intern / FrontEnd Developer, Complete Computers and Technology
-------------	---

Education

Mar. 2015 - Jan. 2019	Bachelor in Computer Science <i>Federal University of Petroleum Resources, Nigeria. Thesis: "Automated Waste Management System"</i>
May 2013	Senior School Certificate Examination <i>NECO, Standard Foundation High School, Benin City, Nigeria.</i>

Projects

2025 - 2026	Intelligent Assessment Service cyberGEIGER GmbH – Python, Azure AI Foundry, RAG, Agentic Workflows • Agentic AI and RAG workflow for automated cybersecurity threat and vulnerability assessment of SMEs' security posture • Designed an n8n data-ingestion pipeline that pulls cybersecurity news articles from Google Sheets, scrapes and validates the content via an LLM agent, and indexes it into a RAG vector database – the knowledge base powering the service's threat-landscape assessments for SMEs
2025 - 2026	cyberCoach cyberGEIGER GmbH – Python, Agentic AI, Telegram & WhatsApp Bots • Conversational AI security-awareness assistant designed for non-technical users – responds instantly to security incidents with actionable advice via WhatsApp and Telegram, accessible from any device, anywhere • Showcased at the CyberSuite hackathon: cybersuiteproject.eu/hackathon25 • WhatsApp bot: wa.me/491634706861 Telegram bot: t.me/cyberCoachChatBot
2025 - 2026	Efficient Domain Adaptation for LLMs – Phishing Email Analysis cyberGEIGER GmbH – Python, PEFT/LoRA, Supervised Fine-Tuning, LLM Evaluation • Researched domain adaptation of foundation models via supervised fine-tuning, PEFT/LoRA adapters, and model merging for a phishing-email analysis use case, fine-tuning a lightweight adapter so the model could reason about threats rather than only classify them • Built an instruction-style data synthesis pipeline to transform a security dataset into instructional training examples, and a separate evaluation pipeline to assess the fine-tuned model's performance • Published the resulting LoRA adapter, instruction dataset, and training notebook as open-source resources, with a live demo of the phishing-reasoning model • Demo: huggingface.co/spaces/nosadaniel/finetuned-model • Open-source resources: LoRA adapter instruction dataset training notebook
2025 - 2026	DataPro Assistant cyberGEIGER GmbH (DataPro Erasmus+) – Python, OpenAI SDK, FastAPI, React, TypeScript • AI learning assistant chatbot for the DataPro Erasmus+ programme with Pädagogische Hochschule Freiburg • datapro.cyber-geiger.com
2025 - 2026	sysder AI Assistant cyberGEIGER GmbH – Flutter, Dart, Azure AI Foundry • An agentic AI learning-assistant chatbot with an admin panel for teachers to configure learning paths and content for students; demoed as part of a university business-education programme with Pädagogische Hochschule Freiburg • sysder.cyber-geiger.com

2021 - 2026	GeigerToolbox IIT (FHNW) & cyberGEIGER GmbH – Flutter, Dart - SME-facing cybersecurity risk-assessment and monitoring app; prototyped and researched at IIT (FHNW) as part of the EU Horizon 2020 GEIGER project, then owned and evolved into a production-ready application at cyberGEIGER GmbH - Designed the app's release CI/CD (GitHub Actions) – a merge-triggered orchestrator that classifies conventional-commit history into release/patch/none and ships to environment-gated (dev/stg/prod) Play Store and Firebase targets with automatic semantic-version tagging - cyber-geiger.eu
2025 - 2026	DataPro Games – Smart Home Challenge & Nothing-to-Hide cyberGEIGER GmbH (DataPro Erasmus+) – React, TypeScript, Vite - Web games teaching IoT security and GDPR/data-protection skills, co-developed for the DataPro Erasmus+ programme with Pädagogische Hochschule Freiburg - dataprogames.ph-freiburg.de/smarthome-challenge - dataprogames.ph-freiburg.de/nothing-to-hide
2025 - 2026	Infrastructure as Code cyberGEIGER GmbH – Terraform, Azure Author Terraform modules provisioning Azure infrastructure for the platform's AI services, including the sysder AI Assistant deployment and the cyberGEIGER platform gateway
2025	KCNA Practice Exam App Open Source - Static web app for practicing Kubernetes and Cloud Native Associate (KCNA) exam questions - Randomized exam generator with configurable domain distribution, dynamic timer, and instant results with a review of missed questions - github.com/nosadaniel/kcna_cert_demo_quiz
2026	Open Source Contributions force_update_helper (Flutter/Dart): contributed to a package for remotely-controlled app force-update prompts. github.com/bizz84/force_update_helper – 50+ stars, 22+ forks PasswordChecker (Swift): contributed to an iOS/macOS password-strength library wrapping Dropbox's zxcvbn. github.com/Loupehope/PasswordChecker – 6+ stars, 9+ forks

Skills

AI / ML LLM Fine-Tuning, PEFT/LoRA, Data Synthesis, LLM Evaluation, RAG, Vector Databases, Model Merging, Agentic Workflows, Azure AI Agents, LangChain, Microsoft Agent Framework.

Cloud & DevOps Azure, Terraform (IaC), Docker, Kubernetes, CI/CD (GitHub Actions, GitLab CI).

Backend Python, FastAPI, Django, REST APIs, Swagger, Postman.

Frontend & Mobile Flutter, Dart, TypeScript, SwiftUI, Swift, Firebase.

Cybersecurity Vulnerability Analysis, Phishing Detection, GDPR / Data Protection.

Design UI Design (Figma, Adobe XD), User Experience (Miro).

Languages English (Native/Bilingual), German (A2 – Limited Working).

Certifications KCNA (Kubernetes and Cloud Native Associate); LFS250 (Kubernetes and Cloud Native Essentials); Introduction to Cloud Infrastructure Technologies (edX, Verified Certificate); Data Engineering: Data Principles (Lightbend).
