Summary

AI / Full-Stack Engineer with 5+ years of software engineering experience, building production LLM features – RAG pipelines, agentic workflows and PEFT/LoRA fine-tuning – with Python, FastAPI and Azure AI Foundry, and delivering them end to end across Flutter, React and Azure/Terraform CI/CD, from data ingestion to the user-facing app.

Work Experience

Aug. 2024 – Present

Software Engineer, cyberGEIGER GmbH
Freiburg, Germany

- Built a RAG and agentic-workflow backend service in Python/FastAPI on Azure AI Foundry that powers AI-driven risk assessments and personalised guidance for SME users of the GEIGER app.
- Conducted R&D into low-cost, private LLMs for SMEs: fine-tuned and evaluated PEFT/LoRA adapters for a domain-specific reasoning task (phishing-email analysis), reaching 93.4% accuracy and 93.1% F1.
- Owned end-to-end delivery, from requirements to production, of web learning platforms for the EU-funded DataPro Erasmus+ programme with Pädagogische Hochschule Freiburg, used by teachers in high-school classrooms across 4 EU partner countries.
- Built and maintained a cross-platform Flutter app (iOS, Android, web) shipped to the App Store and Google Play, validated by SME use-case partners at two EU hackathons (2025, 2026).
- Provisioned Azure infrastructure with Terraform and built CI/CD pipelines with GitHub Actions and Sentry, enabling repeatable deployments and real-time production error monitoring.

Mar. 2023 – Aug. 2024

IT Consultant, IAESTE Services / ISACD
Nigeria

- Advised SMEs on cybersecurity, assessing their risks and recommending practical security measures and tools suited to their size and budget.

Apr. 2021 – Jan. 2023

Research Assistant Institute for Interactive Technologies (IIT), FHNW
Windisch, Switzerland

- Built GeigerToolbox, a Flutter/Dart cybersecurity risk-assessment app for SMEs, within the EU Horizon 2020 GEIGER research project; it became the foundation of today's production GEIGER app.
- As an intern, designed and prototyped the initial GeigerToolbox concept and architecture.

Apr. 2019 – Mar. 2021 | **Software Developer**, Federal University of Petroleum Resources
ICT Unit, Nigeria
- Built and maintained the university website and student portal using HTML, CSS, JavaScript, PHP and MySQL.

May 2017 – Dec. 2018 | **Frontend Developer Intern**, Complete Computers and Technology, Nigeria

Projects

2025 - 2026 | **Intelligent Assessment Service** | cyberGEIGER GmbH – Python, FastAPI, Azure AI Foundry, RAG, Agents
- Built an agentic AI and RAG workflow for SME risk assessment, including an n8n ingestion pipeline that scrapes, validates, and indexes source material into the RAG knowledge base.

2025 - 2026 | **Efficient Domain Adaptation for LLMs – Phishing Email Analysis** | cyberGEIGER – Python, PEFT/LoRA
- Fine-tuned and evaluated LoRA adapters for phishing-email threat reasoning beyond binary classification, showing SMEs can run affordable, private LLMs: Demo | Write-up

2026 | **MCP Research Server (learn_ai)** | Personal Project – Python, FastMCP, Docker, GitHub Actions
- Built a Model Context Protocol (MCP) server exposing tools, prompts, and resources for arXiv paper search; containerized with multi-arch Docker builds and GitHub Actions CI/CD, integrated with Claude Desktop and ChatGPT: GitHub | Write-up

2025 - 2026 | **sysder AI Assistant** | cyberGEIGER GmbH – Flutter Web, Dart, Azure AI Foundry
- Built a Flutter Web AI learning-assistant chatbot with a teacher admin interface for configuring student learning paths, demonstrated with Pädagogische Hochschule Freiburg: sysder.cyber-geiger.com

2025 - 2026 | **cyberCoach** – Python, Agentic AI, Telegram & WhatsApp Bots
- Built a conversational agentic AI assistant on Telegram & WhatsApp that coaches non-technical users through everyday digital-safety decisions, showcased at the CyberSuite hackathon: cybersuiteproject.eu/hackathon25

2021 - 2026 | **GeigerToolbox** | IIT (FHNW) & cyberGEIGER GmbH – Flutter, Dart
- Merge-triggered GitHub Actions release workflow (semantic versioning, Firebase UAT): cyber-geiger.eu | Google Play | App Store

Skills

Core Stack Python, FastAPI, RAG, Agentic AI, MCP, LLM fine-tuning (PEFT/LoRA), Azure AI Foundry, Flutter, Dart, Azure, Terraform, Docker, GitHub Actions (CI/CD), MongoDB.
AI Tooling LangChain, Microsoft Agent Framework, LLM evaluation, n8n.
Also Experienced React, TypeScript, Node.js, REST & gRPC APIs, PostgreSQL, MySQL, Kubernetes, Sentry, Shorebird Code Push, PHP.
Certifications Model Context Protocol Associate (MCPA), Kubernetes and Cloud Native Associate (KCNA)
Languages English (Native), German (A2)

Education

Bachelor in Computer Science, Federal University of Petroleum Resources, Nigeria Mar. 2015 – Jan. 2019
Thesis: "Automated Waste Management System"
