Summary

Full-stack Software Engineer building production AI and cross-platform mobile/web products for cybersecurity use cases – shipping Flutter apps to the Play Store and App Store, React web products, and agentic AI/RAG systems on Azure AI. Fine-tunes and evaluates LLMs for security applications, and owns the full delivery pipeline: Terraform-provisioned Azure infrastructure and CI/CD release engineering from prototype to production.

Work Experience

Aug. 2024 - Present	Software Engineer, cyberGEIGER GmbH <i>Freiburg, Germany</i> - Developed agentic AI and retrieval-augmented generation (RAG) systems on Azure AI for cybersecurity use cases, including automated threat and vulnerability assessments through the Intelligent Assessment Service and security-awareness training with cyberCoach - Built and shipped cross-platform Flutter apps – GeigerToolbox and the sysder AI Assistant – to production on the Google Play Store and Apple App Store, and designed a merge-triggered CI/CD release pipeline (GitHub Actions) that auto-classifies commits and ships to environment-gated dev/stg/prod targets with semantic-version tagging - Built AI-powered learning products for the DataPro Erasmus+ programme with Pädagogische Hochschule Freiburg – a React/TypeScript web-games suite teaching IoT security and GDPR compliance, and an OpenAI-SDK-backed learning-assistant chatbot (FastAPI, React) - Provisioned and evolved Azure cloud infrastructure using Terraform and infrastructure-as-code practices - Fine-tuned and evaluated a PEFT/LoRA adapter for phishing-email threat reasoning, reaching 93.4% accuracy and 93.1% F1, and published the adapter, training data, and pipeline as open-source resources
Mar. 2023 - Aug. 2024	IT Consultant, IAESTE Services / ISACD – Benin City, Nigeria – IT consulting and exchange administration for IAESTE's student exchange programme
Mar. 2022 - Jan. 2023	Research Assistant, Institute for Interactive Technologies (IIT), FHNW – Built GeigerToolbox, a cybersecurity risk-assessment tool for SMEs, as part of the EU Horizon 2020 GEIGER research project
Apr. 2021 - Mar. 2022	Mobile Application Developer (Intern), Institute for Interactive Technologies (IIT), FHNW – Prototyped and designed the initial GeigerToolbox concept for the EU Horizon 2020 GEIGER research project

Early Career

Apr. 2020 - Mar. 2021	Frontend Instructor, HarvardCom Computer Institute and Technologies – Benin City, Nigeria
May 2019 - Mar. 2020	FrontEnd Developer (Intern), ICT, Federal University of Petroleum Resources – Benin City, Nigeria
Jul. 2017 - Mar. 2019	Learning Facilitator, Google Digital Skills for Africa – Benin City, Nigeria
May 2017 - Dec. 2018	FrontEnd Developer (Intern), Complete Computers and Technology – Benin City, Nigeria

Education

Mar. 2015 - Jan. 2019	Bachelor in Computer Science <i>Federal University of Petroleum Resources, Nigeria. Thesis: “Automated Waste Management System”</i>
May 2013	Senior School Certificate Examination <i>NECO, Standard Foundation High School, Benin City, Nigeria.</i>

Projects

2025 - 2026	Intelligent Assessment Service cyberGEIGER GmbH – Python, Azure AI Foundry, RAG, Agentic Workflows - Agentic AI and RAG workflow for automated cybersecurity threat and vulnerability assessment of SMEs’ security posture - Designed an n8n data-ingestion pipeline that pulls cybersecurity news articles from Google Sheets, scrapes and validates the content via an LLM agent, and indexes it into a RAG vector database – the knowledge base powering the service’s threat-landscape assessments for SMEs
2025 - 2026	Efficient Domain Adaptation for LLMs – Phishing Email Analysis cyberGEIGER GmbH – Python, PEFT/LoRA, Supervised Fine-Tuning, LLM Evaluation - Researched domain adaptation of foundation models via supervised fine-tuning, PEFT/LoRA adapters, and model merging for a phishing-email analysis use case, fine-tuning a lightweight adapter so the model could reason about threats rather than only classify them - Built an instruction-style data synthesis pipeline and a separate evaluation pipeline, reaching 93.4% accuracy, 97.4% precision, 89.1% recall, and 93.1% F1 on phishing-threat reasoning classification - Published the resulting LoRA adapter, instruction dataset, and training notebook as open-source resources, with a live demo of the phishing-reasoning model - Demo: huggingface.co/spaces/nosadaniel/finetuned-model Write-up - Open-source resources: LoRA adapter instruction dataset training notebook
2025 - 2026	sysder AI Assistant cyberGEIGER GmbH – Flutter, Dart, Azure AI Foundry - An agentic AI learning-assistant chatbot with an admin panel for teachers to configure learning paths and content for students; demoed as part of a university business-education programme with Pädagogische Hochschule Freiburg sysder.cyber-geiger.com
2021 - 2026	GeigerToolbox IIT (FHNW) & cyberGEIGER GmbH – Flutter, Dart - SME-facing cybersecurity risk-assessment and monitoring app; prototyped and researched at IIT (FHNW) as part of the EU Horizon 2020 GEIGER project, then owned and evolved into a production-ready application at cyberGEIGER GmbH - Designed the app’s release CI/CD (GitHub Actions) – a merge-triggered orchestrator that classifies conventional-commit history into release/patch/none and ships to environment-gated (dev/stg/prod) Play Store and Firebase targets with automatic semantic-version tagging cyber-geiger.eu Android: Play Store iOS: App Store
2025 - 2026	Other Projects cyberCoach (Python, Agentic AI, Telegram & WhatsApp Bots) – Conversational AI security-awareness assistant for non-technical users, showcased at the CyberSuite hackathon: cybersuiteproject.eu/hackathon25 DataPro Games – Smart Home Challenge & Nothing-to-Hide (React, TypeScript, Vite) – Web games teaching IoT security and GDPR/data-protection skills for the DataPro Erasmus+ programme: Smart Home Challenge Nothing-to-Hide learn_ai – MCP Research Assistant (Python, MCP, FastMCP, Claude 3.7 Sonnet) – Custom FastMCP server for real-time arXiv paper retrieval and summarization: github.com/nosadaniel/learn_ai

Skills

AI / ML Agentic AI, RAG, LLM Fine-Tuning (PEFT/LoRA), n8n, LangChain, Microsoft Agent Framework, Azure AI Foundry.
Frontend & Mobile Flutter, Dart, React, TypeScript, Cross-Platform (Android/iOS).
Backend & Cloud Python, FastAPI, Azure, Terraform (IaC), CI/CD (GitHub Actions).
Languages & Certifications English (Native), German (A2); KCNA, LFS250 (Kubernetes & Cloud Native).
