Date of birth: 02.06.1994 | Work permit: Blaue Karte EU

Profile

Full-Stack AI Engineer with 5+ years of software engineering experience, currently building production LLM systems – RAG, agentic workflows, conversational AI and fine-tuned models – end to end, from data ingestion and backend APIs to live web and mobile products. Pragmatic and delivery-focused, with a track record of taking products from research prototype to production alongside EU research, education and SME partners.

Work Experience

08.2024 – present

Software Engineer, cyberGEIGER GmbH, Freiburg, Germany

- Delivered a production RAG and agentic-workflow service in Python/FastAPI with Azure OpenAI and Azure AI Search, orchestrating LLM and tool calls to power AI-driven risk assessments in the GEIGER app.
- Designed the ingestion pipeline behind it: an n8n workflow that collects, parses and structures content from multiple sources, with an LLM agent as a validation gate before embedding and indexing.
- Developed cyberCoach, a conversational AI assistant live in production on WhatsApp and Telegram, built on a channel-agnostic agent core.
- Conducted R&D into low-cost, private LLMs for SMEs: fine-tuned and evaluated PEFT/LoRA adapters for a domain-specific reasoning task (phishing-email analysis), reaching 93.4% accuracy and 93.1% F1.
- Owned end-to-end delivery, from requirements to production, of full-stack learning platforms for the EU-funded DataPro Erasmus+ programme with Pädagogische Hochschule Freiburg (React/TypeScript, Node.js/Express, FastAPI, OpenAI APIs), used by teachers across 4 EU countries.
- Led DevOps practices and release management for cross-platform applications (iOS, Android, web) and the deployment of containerized backend services.
- Provisioned Azure infrastructure with Terraform and set up production monitoring with OpenTelemetry, Grafana, Prometheus and Sentry.

03.2023 – 08.2024

IT Consultant, IAESTE Services / ISACD, Nigeria

- Advised SMEs on cybersecurity: assessed their risks and recommended practical measures and tools suited to their size and budget.

04.2021 – 01.2023

Research Assistant, Institute for Interactive Technologies (IIT), FHNW, Windisch, Switzerland

- Took GeigerToolbox from initial concept and architecture (as intern) to a working Flutter/Dart risk-assessment app for SMEs in the EU Horizon 2020 GEIGER project – the foundation of today's production GEIGER app.

04.2019 – 03.2021 | **Software Developer** ICT Unit, Federal University of Petroleum Resources, Nigeria
- Built and maintained the university website and student portal with HTML, CSS, JavaScript, PHP and MySQL.

05.2017 – 12.2018 | **Frontend Developer Intern**, Complete Computers and Technology, Nigeria

Certifications

10.2026 | **Model Context Protocol Associate (MCPA)**
Applied in an open-source MCP server (Python/FastMCP) for arXiv paper search, containerized with Docker and CI/CD and integrated with Claude Desktop, Cursor and ChatGPT

06.2025 | **Kubernetes and Cloud Native Associate (KCNA)**, The Linux Foundation

06.2023 | **Agile and Scrum Fundamentals**, IBM

03.2023 | **Reactive Architecture: Reactive Microservices**, Lightbend

Education

03.2015 – 01.2019 | **Bachelor in Computer Science**, Federal University of Petroleum Resources, Nigeria
Thesis: "Automated Waste Management System"

Skills

AI / LLM Azure OpenAI, OpenAI APIs, RAG, embeddings & vector search, Agentic AI, MCP, LangChain, Microsoft Agent Framework, LLM fine-tuning & evaluation (PEFT/LoRA).
Backend & Data Python, FastAPI, Node.js/Express, REST & gRPC APIs, MongoDB, PostgreSQL, MySQL, n8n.
Frontend & Mobile Flutter/Dart, React, TypeScript.
Cloud & DevOps Azure, Terraform, Docker, Kubernetes, GitHub Actions, OpenTelemetry, Grafana, Prometheus.
Languages English (native), German (A2; B1 course in progress).
