Summary

Full-stack software engineer with experience building AI-enabled cybersecurity products, cross-platform mobile applications, and web platforms. Works across Python, Flutter/Dart, React/TypeScript, Azure, and cloud delivery – from applied LLM and RAG development through infrastructure, release automation, and production support.

Work Experience

Aug. 2024 - Present	Software Engineer, cyberGEIGER GmbH <i>Freiburg, Germany</i> - Developed AI-enabled cybersecurity products, including RAG and agentic workflows for threat and vulnerability assessment and security-awareness learning - Built and maintained Flutter applications across mobile and web platforms, including Geiger-Toolbox for Android and iOS and the web-based sysder AI Assistant - Delivered web-based learning products for the DataPro Erasmus+ programme with Pädagogische Hochschule Freiburg using React, TypeScript, FastAPI, and OpenAI APIs - Designed and operated cloud delivery workflows using Azure, Terraform, GitHub Actions, and Sentry - Conducted applied LLM fine-tuning and evaluation for phishing-email threat reasoning; published selected models, data, and pipelines as open-source resources
Mar. 2023 - Aug. 2024	IT Consultant , IAESTE Services / ISACD – Benin City, Nigeria – IT consulting and exchange administration for IAESTE's student exchange programme
Mar. 2022 - Jan. 2023	Research Assistant , Institute for Interactive Technologies (IIT), FHNW, Switzerland – Built Geiger-Toolbox, a cybersecurity risk-assessment tool for SMEs, as part of the EU Horizon 2020 GEIGER research project
Apr. 2021 - Mar. 2022	Mobile Application Developer Intern , Institute for Interactive Technologies (IIT), FHNW, Switzerland – Prototyped and designed the initial GeigerToolbox concept for the EU Horizon 2020 GEIGER research project

Early Career

Apr. 2020 - Mar. 2021	Frontend Instructor , HarvardCom Computer Institute and Technologies – Benin City, Nigeria
May 2019 - Mar. 2020	Frontend Developer Intern , ICT, Federal University of Petroleum Resources – Benin City, Nigeria
Jul. 2017 - Mar. 2019	Learning Facilitator , Google Digital Skills for Africa – Benin City, Nigeria
May 2017 - Dec. 2018	Frontend Developer Intern , Complete Computers and Technology – Benin City, Nigeria

Education

Mar. 2015 - Jan. 2019	Bachelor in Computer Science <i>Federal University of Petroleum Resources, Nigeria. Thesis: “Automated Waste Management System”</i>
May 2013	Senior School Certificate Examination <i>NECO, Standard Foundation High School, Benin City, Nigeria.</i>

Projects

2025 - 2026	Intelligent Assessment Service cyberGEIGER GmbH – Python, Azure AI Foundry, RAG, Agentic Workflows - Built an agentic AI and RAG workflow for assessing SME cybersecurity posture, threats, and vulnerabilities - Developed an n8n ingestion workflow that retrieves cybersecurity news from Google Sheets, scrapes and validates source content with an LLM agent, and indexes approved material into the service’s RAG knowledge base
2025 - 2026	Efficient Domain Adaptation for LLMs – Phishing Email Analysis cyberGEIGER GmbH – Python, PEFT/LoRA, Supervised Fine-Tuning, LLM Evaluation - Investigated supervised fine-tuning, PEFT/LoRA adapters, and model merging to improve phishing-email threat reasoning beyond binary classification - Built separate instruction-data synthesis and evaluation pipelines; achieved 93.4% accuracy, 97.4% precision, 89.1% recall, and 93.1% F1 - Published the LoRA adapter, instruction dataset, and training notebook as open-source resources, with a live demo and technical write-up - Demo Write-up LoRA adapter Dataset Training notebook
2025 - 2026	sysder AI Assistant cyberGEIGER GmbH – Flutter Web, Dart, Azure AI Foundry - Built a web-based Flutter AI learning-assistant chatbot with an admin interface that enables teachers to configure student learning paths and content; demonstrated within a business-education programme with Pädagogische Hochschule Freiburg - Website: sysder.cyber-geiger.com
2021 - 2026	GeigerToolbox IIT (FHNW) & cyberGEIGER GmbH – Flutter, Dart - Developed a cybersecurity risk-assessment and monitoring application for SMEs, progressing it from an EU Horizon 2020 research prototype at IIT (FHNW) to a production-ready product at cyberGEIGER GmbH - Built a merge-triggered GitHub Actions release workflow that classifies conventional commits, assigns semantic versions, distributes environment-gated builds through Firebase for UAT, and releases production versions to Google Play and the Apple App Store - Website: cyber-geiger.eu Android: Google Play iOS: Apple App Store
2025 - 2026	Other Projects cyberCoach (Python, Agentic AI, Telegram & WhatsApp Bots) – Conversational AI security-awareness assistant for non-technical users, showcased at the CyberSuite hackathon: cybersuiteproject.eu/hackathon25 DataPro Games (React, TypeScript, Vite) – Web games teaching IoT security and GDPR/data-protection concepts for the DataPro Erasmus+ programme: Smart Home Challenge Nothing-to-Hide learn_ai (Python, MCP, FastMCP, LangChain) – FastMCP server for real-time arXiv paper retrieval and summarization: github.com/nosadaniel/learn_ai

Skills

AI-Assisted Engineering Claude Code, Cursor – agentic coding workflows with human-reviewed pull requests and merges.

AI / LLM Engineering Agentic AI, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), LLM fine-tuning (PEFT/LoRA), LangChain, Microsoft Agent Framework, Azure AI Foundry, n8n

Frontend & Mobile Flutter, Dart, React, TypeScript, Cross-Platform (Android/iOS), Shorebird Code Push.

Backend & Cloud & DevOps Python, FastAPI, REST APIs, Azure, Docker, Terraform (IaC), Git, Github Actions (CI/CD)

Languages & Certifications English (Native), German (advanced beginner); KCNA(Kubernetes & Cloud Native Associate).
